ScareCrow®

AUTOMATIC OUTDOOR ANIMAL DETERRENT

Simply and effectively chases animals out of your pond or garden with water.

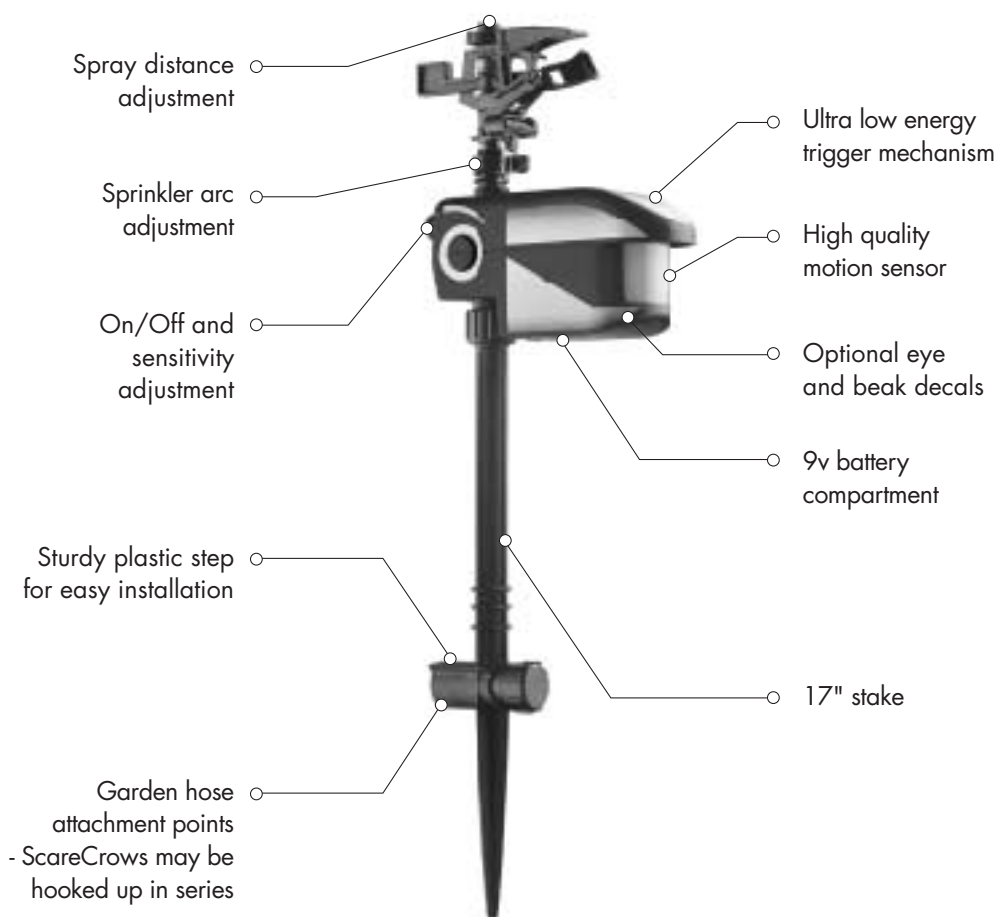

Protect your garden or pond from unwanted animal intruders. The Scarecrow motion activated sprinkler instantly releases a short but startling burst of water when it detects an animal. The sudden water, movement and noise scare animals away, and help teach them to avoid the area in the future.

ScareCrow®

AUTOMATIC OUTDOOR ANIMAL DETERRENT

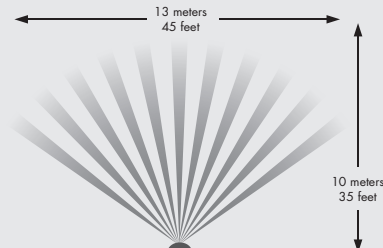

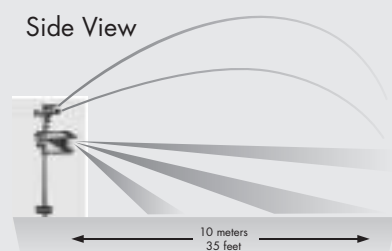

Simply and effectively chases animals out of your pond or garden with water.

- Motion activated sprinkler instantly releases a short but startling burst of water when it detects an animal, scaring them away
- Humane, safe and environmentally friendly; uses only a small amount of water each time
- Highly sensitive motion detector senses large and small animals
- No chemicals, shocks or unsightly, costly fences or barriers
- Smart circuitry automatically dampens sensitivity in windy conditions to reduce false triggering
- Works day and night for up to 4 months on a single battery
- Each unit covers approx 1200 sq.ft. (112m²)
